Note: the above Lighting System corresponds to the UK version. The European lights sight the fog light on the left hand lighting arm and the number plate on the right hand lighting arm. Lighting system wired to 7 pin plug. Recommended number plate size 240mm x 340mm.

Arms located at the front of the trailer serve no purpose other than to locate the forward facing reflectors. These arms are NOT to be used as tie down points.

Trailer supplied with lighting system, loading system, secondary coupling and 8" wheels as standard. The loading system does NOT replace the use of tie down straps.
